1 Summary

In September 2010 a large soil, climate change and biodiversity conference\(^1\) was planned in Brussels. In conjunction with the European Soil Bureau Network (ESBN) annual plenary meeting that took place during the same week as this conference, the e-SOTER project held the mid-term stakeholder conference at the same venue. This allowed an almost complete representation of soil scientists from the European Union member countries.

Several presentations on e-SOTER, its aims and products, were given by consortium partners, followed by discussions with the audience.

2 Presentations

The general background of the project, its role in the GEOSS Global Soil Task as well as technical achievements and future products were elaborated. Presentation can be downloaded from [http://eusoils.jrc.ec.europa.eu/esbn/Esbn_Meetings_plenary2010.html](http://eusoils.jrc.ec.europa.eu/esbn/Esbn_Meetings_plenary2010.html) or by clicking the links in table 1.
